

true_type

A diagram illustrating a relationship between a C++ type and a testing namespace. A light gray rectangular box at the bottom contains the text `testing::internal::LosslessArithmeticConvertible` followed by a template implementation `Impl< kBool, bool, kBool, bool >`. A blue arrow points vertically upwards from the top center of this box to a white rectangular box at the top, which contains the text `true_type`.

```
testing::internal::  
LosslessArithmeticConvertible  
Impl< kBool, bool, kBool,  
      bool >
```
